

# Fern range.

Our Fern freestanding planter has a great minimal design and will coordinate with a variety of products. The planter is fully welded for a waterproof seal and has drainage tubes with removable plugs.

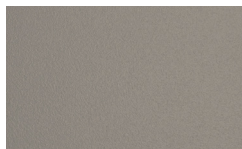

Choose from 3 different shapes and a variety of sizes with forklift or standard bases.

## Materials and Finishes

The Fern is made from 3mm thick recycled steel, available in a corten or triple process powder coated finish to a standard RAL. We have a carefully selected suggested RAL colour palette for all our products, details available on request.

Corten untreated

Triple process powder coated steel to standard RAL

## Installation instructions

---

- All Fern planters are supplied fully assembled.
- Plugs can be removed from drainage pipes to allow water to drain from the planter.
- Products are pre-fitted with adjustable feet, which prevent the steelwork and paving from marking and allow for variation in ground levels.
- We recommend filling planters with gravel or a similar well-draining substrate above the drainage tube level (100mm high).

## Personnel and tools required

- An adjustable spanner is recommended to alter the foot height.
- We would recommend a minimum of 4 suitably skilled workers to move the planters.

## General handling - health and safety

- Care should be taken when manually handling these items, including good lifting and transportation practices.
- Hand and foot protection must be used when moving and installing these products.
